MODEL PS50 M

PARTS LIST
HONDA GENUINE PARTS

HONDA
GENUINE PARTS

3

HOW TO USE THIS PARTS LIST

1. This Parts List is used on the Honda 50 Model PS50.
2. In each component block, parts are arranged according to the disassembly procedure except for standard parts such as bolts, nuts which are found at the bottom of the page. Therefore, this list can also be utilized as a manual for servicing as well as for placement of orders for spare parts.
3. Composition of Part Number is as follows:

(General Part)

51500 - 064 - 02 0 D

Function and Component No. _____
Model Code No. _____
Modification Designation _____
Sub-contractor Designation _____
Color Code _____

(Bolt)

92000 - 08018 - 0 A

Component No. _____
Dimensions _____
ISO Standard Designation _____
Surface Treatment Designation _____

(Nut)

94001 - 080 20 - OS

Component No. _____
Dimensions _____
Surface Treatment Designation _____
ISO Standard Designation _____

4. Announcement on parts modifications will be made with Parts News and/or Revision Sheets.
5. The figure under the heading "No. Used" indicates the number of pieces used in the respective component block.
6. Frame No. is located on the frame below the air cleaner case.
7. Dimensions are indicated in millimeters except for steel balls which are indicated in inches.

8. When modifications are made to a part, the reference number will change as 1-1. 1-2 etc. for the modified part with applicable serial numbers entered for each of it.
9. Placement of orders are requested to be made with our Parts Division under the Part Numbers, not by part descriptions.
10. This Parts List was compiled as of 1st April, 1969.

Honda Motor Co., Ltd.

Service Division

ISO THREADED PARTS

- Not interchangeable with the previous threaded parts -

Threaded parts used in this model conform to the Thread Standard of ISO (International Standardization Organization), and are different from those used in the earlier models.

For servicing this model, therefore, tool set for the earlier models is not sufficient. Socket or box wrenches for 5.5 mm, 7 mm, 12 mm, 22 mm, 24 mm and 27 mm in width across the flats will become necessary.

ISO threads with 3 mm, 4 mm, 5 mm and 12 mm thread diameters are different in pitches from the earlier threads, therefore, confused use of threaded parts will result in damages to threads.

Change in pitch

Thread Diameter	Earlier Pitch	ISO Pitch
3 mm	0.6	0.5
4 mm	0.75	0.7
5 mm	0.9	0.8
12 mm	1.5	1.25

Width across flat

Pitch

Thread diameter

How to identify ISO threaded parts

For easy identification, the following markings are made on the new ISO threaded parts.

- Hex. bolts  ← Presence of figure on the bolt head
- Cross screws  ← Semi-spherical embossement on the head
- Nuts  ← Semi-spherical dimple

They can also be identified by the part numbers.

92000 - 08012 - OA

Those parts with this marking at the end of the part numbers are of ISO threads.

For further details, please refer to Service Bulletin No. 004 dated April 20, 1967.
